Meeting Minutes 01/17

🕐 Created	@January 17, 2022 2:44 PM
☰ Team	206
☰ Present	Eve, Yiran, Diane, Hongde
👤 Absent	

Agenda

- Affinity diagram

- Product backlog on GitLab

Notes

- A couple of notes on the next step: analysis & design
  - Review each requirement and consider its technical impact (it is possible? risky? too complex? other technologies required? impact on the system?)
  - Add technical details to existing requirements
  - Non-functional requirements:
    - Performance, scalability, usability (critical to the success of our app)
    - Emerges from the way you build something
    - Things prof would maybe think about: user satisfaction (loading time, usability, configurations), privacy
  - 8-12 requirements (both functional and NFR)
    - e.g. "The user should be able to create a new note"

Decisions

-

Action items (TODOs)

☐
